gangopadhyasakshi@gmail.com ♦ www.linkedin.com/in/sakshi-gangopadhy/

OBJECTIVE

Computer Engineering undergraduate with experience in AI systems, business development, technical outreach, and data-driven operations. Skilled in building automation pipelines, managing strategic outreach campaigns, and translating technical projects into business-focused insights. Hands-on experience with Power BI, analytics dashboards, AI tools, and stakeholder engagement. Interested in Energy & Utilities consulting, business intelligence, technical sales, and AI-driven enterprise solutions.

EDUCATION

MIT-ADT University, Pune 2023 – Current
Bachelor of Technology in Computer Engineering
Consistent academic performance with CGPA: 7.5 / 10

TECHNICAL SKILLS

Programming Languages:	Python, R, Java
Machine Learning, AI & Deep Learning:	Supervised Learning, Neural Networks, Model Training & Evaluation, PyTorch, TensorFlow, Scikit-learn, OpenCV, CNN, Image Processing, Gen AI
IoT & Systems Engineering:	Hardware-Software Integration, Embedded C
Business Development Tools:	Power BI, Tableau, MS 365 Copilot, Dashboard Engineering, KPI Tracking, Data Analysis, Data Visualization, Business Intelligence
Tools & Platforms:	Git, GitHub, Google Cloud Console, Tableau, Rstudio, Vertex AI Studio
Business & Technical Operations:	SEO Engineering, Business Development, Technical Development, Outreach Automation, Technical Sales, Consulting

EXPERIENCE

Technical Intern (LatentHQ) Aug '25 – Apr 26
Pune, India

- Executed targeted outreach campaigns engaging 100+ prospects, contributing to strategic partnerships in the AI/tech domain
- Built automated outreach pipelines, reducing manual effort by 30%+ and improving lead tracking efficiency
- Managed end-to-end production of 2+ podcast episodes, optimizing workflows to reduce turnaround time by ~30%

MAJOR PROJECTS

Metal Identification System using Computer Vision (In Progress)

- Developed a computer vision-based metal Identification system using high-resolution imaging and feature extraction, securing ₹4 lakh funding and achieving high-accuracy classification on structured test data
- Tech Stack: Python, OpenCV, Scikit-learn, Computer Vision, CNN, Image Processing

Explainable AI Model Development

- Built ML models with explainability techniques on structured tabular data to perform classification/regression tasks, analyzing 10+ input features to interpret predictions and improve performance through tuning and validation
- Tech Stack: Python, Scikit-learn, Pandas, NumPy

Startup Evaluation Dashboard

- Designed a data-driven dashboard enabling startup valuation analysis, processing multiple input parameters (10+ features) to generate actionable insights and investment-ready summaries
- Tech Stack: Python, Scikit-learn, Explainable AI, Machine Learning

Drone-Based Pollination System (Patent: 202421044528)

- Designed an automated drone-based pollination system, leading to a filed patent and demonstrating scalable precision pollination for low-fertility crops
- Tech Stack: Embedded C, Embedded Systems, IoT, Sensor Integration, Microcontrollers (Arduino/Raspberry Pi), Hardware-Software Integration

LEADERSHIP & ACHIEVEMENTS

Founder/Tech Lead | QQuest Quantum Computing/Mechanics Club:

- Built and led a quantum computing initiative in collaboration with institutional and research organizations, Engaged with scientists from TCG Crest, CDAC, and IISER.

Patent Applicant | Patent No. 202421044528:

- Filed patent application demonstrating technical innovation and original engineering contribution
